

Employment Trends: Desirable Applicant Skills of Physics Degree Holders

Kirk Kleinsasser, APS Careers Intern

Internship Goals

Create and catalogue a database of job postings from the APS Job Board

Perform a quantitative analysis of keywords common to job descriptions

Examine correlations between skills and factors such as employment sector and job permanence

Project Approach

- Existing Tools Could Analyze Our Data
- A Custom Solution is Better
- Identifying job sector and job permanance with Excel
- Preprocessing Improvements

Technical Choices

Simple, high level
language that acts as a
base for the program

Python

Fast, locally stored
database system to store
and query job data

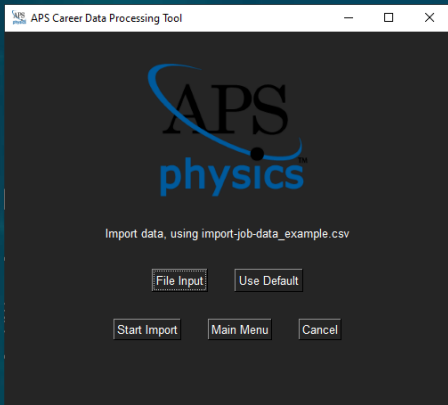

SQLite3

Efficient data processing
module to import and
export job data

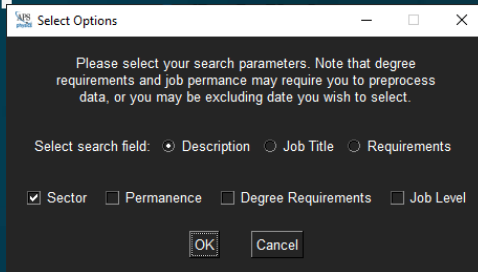

Pandas

Data Processing GUI

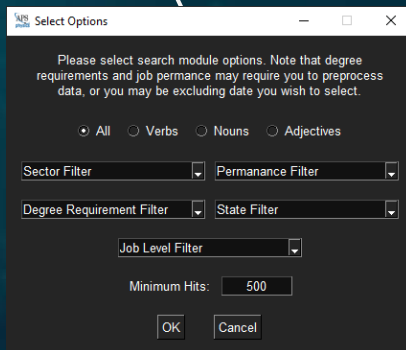

Import Menu

Find Keywords

Analyze Data

Results

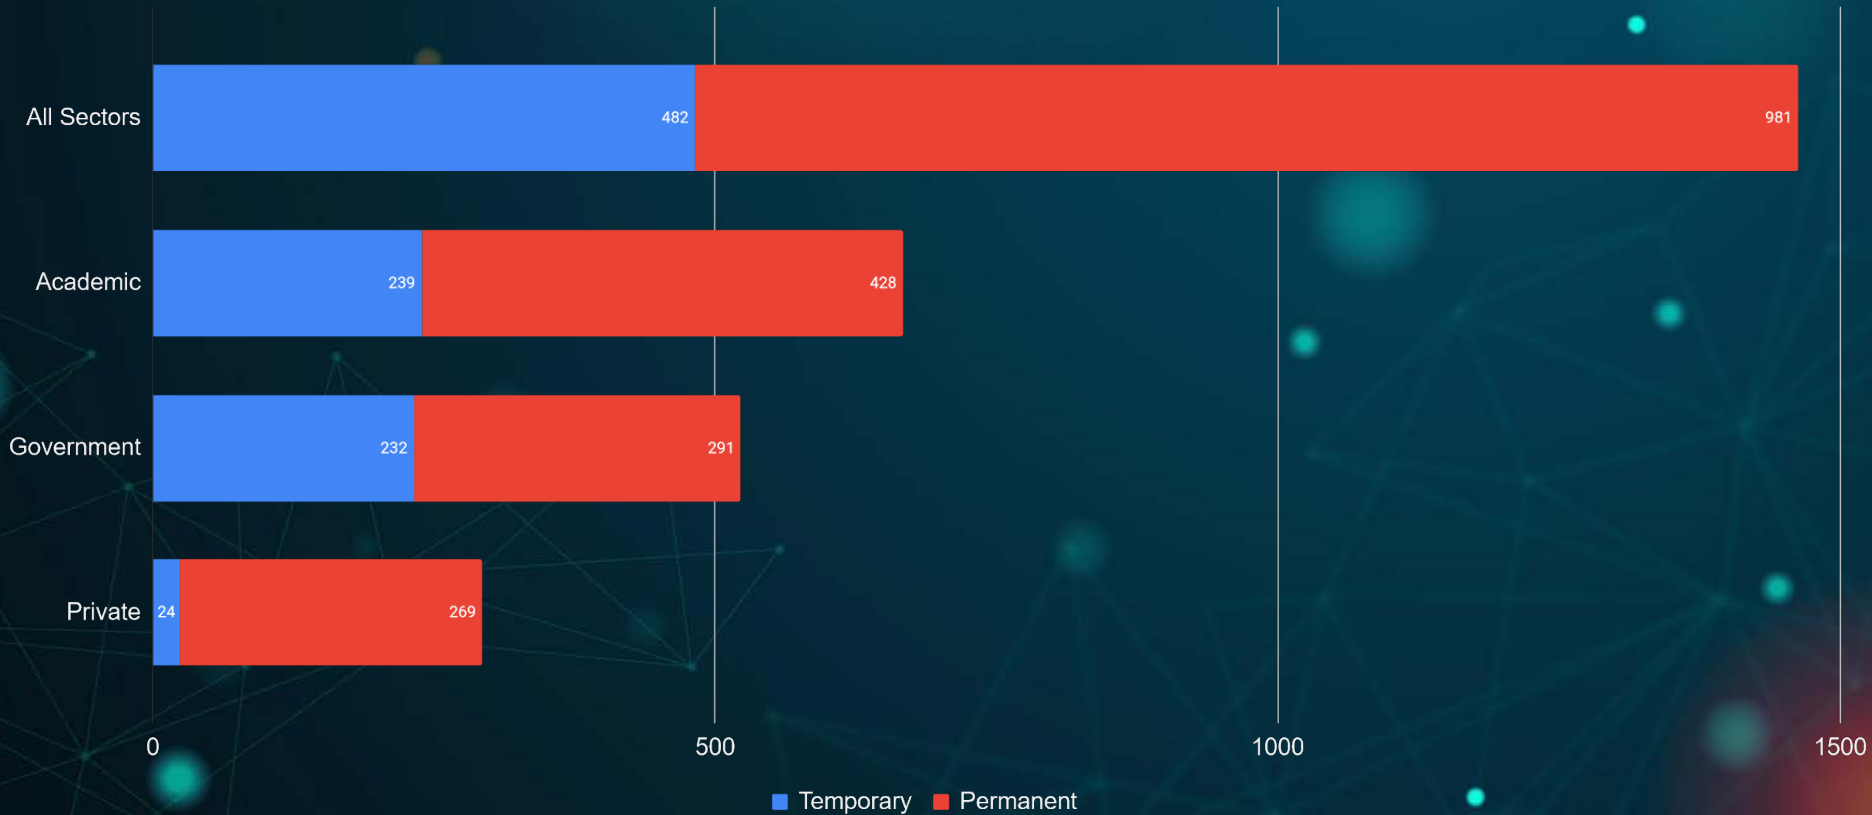

A window titled 'Search Results' containing a table with the following data:

Term	All Jobs	Temporary	Permanent
job	495	135	360
test	337	92	245
123	5	4	1
new	801	248	553
line	734	225	509
and+or	1457	480	977
and/or	1463	1461	1461

Buttons: OK, Export Results

RESULTS

Job permanence by sector for all APS Job Board Postings since 2013 (2013 jobs)

Comparisons of Keywords by Sector* [Selected Terms with Standard Deviation > 15%]

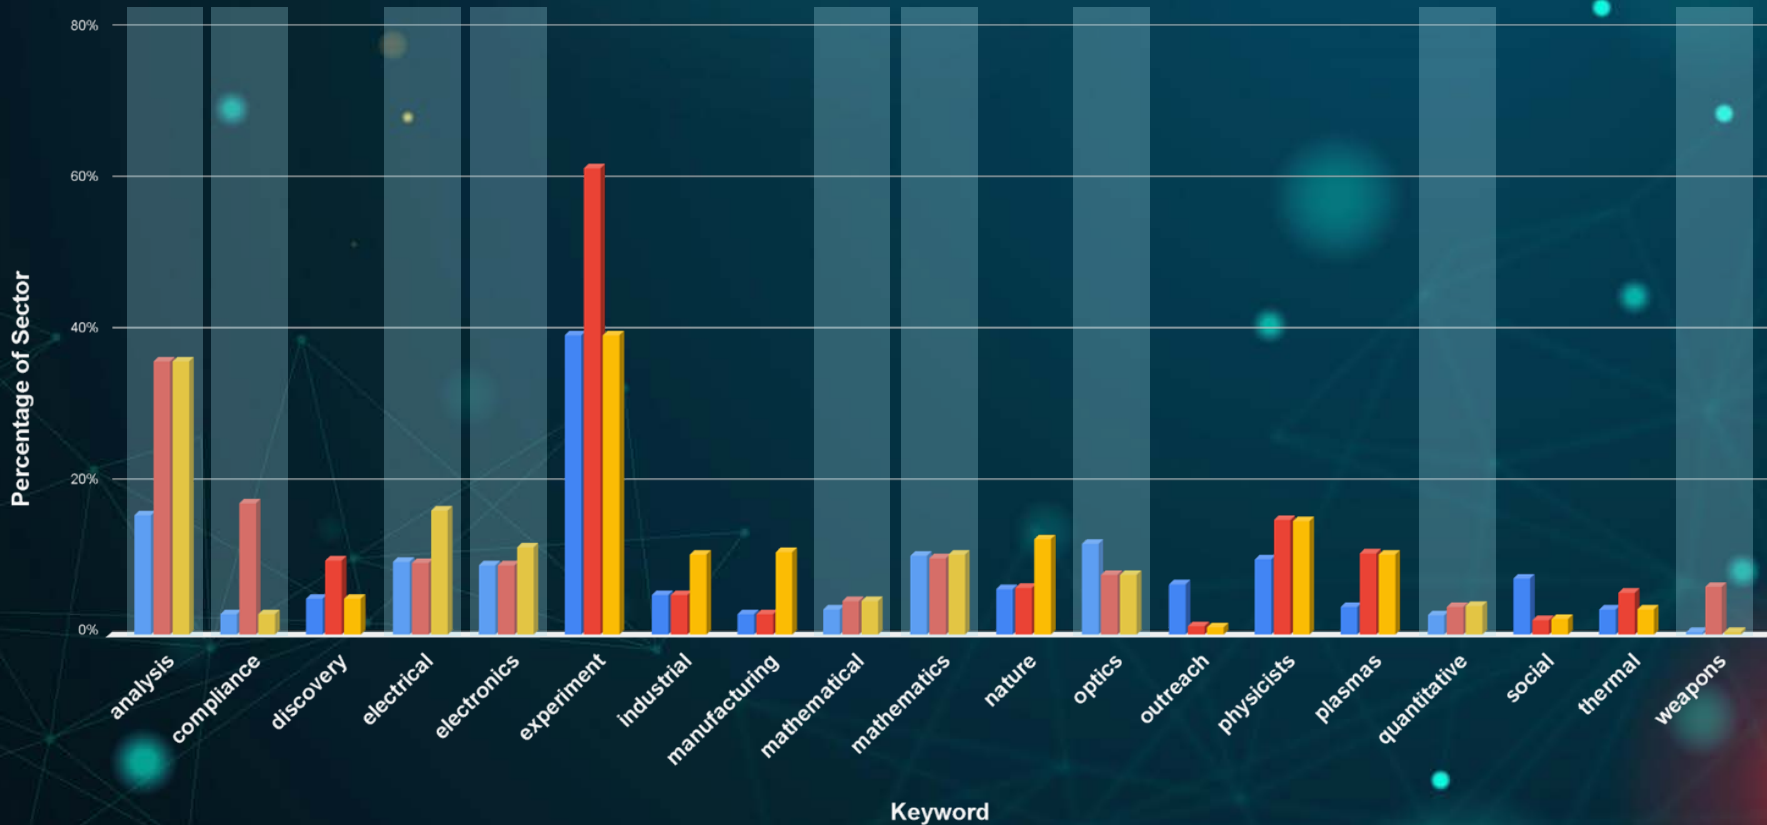

■ Academic
 ■ Government/National Lab
 ■ Private

*this data does not show analyses for nonprofits and other sectors

Comparisons of Keywords by Sector* [Selected Terms with Standard Deviation < 0.1%]

■ Academic
 ■ Government/National Lab
 ■ Private

*this data does not show analyses for nonprofits and other sectors

Comparisons of Diversity Keywords by Sector* [Selected Terms]

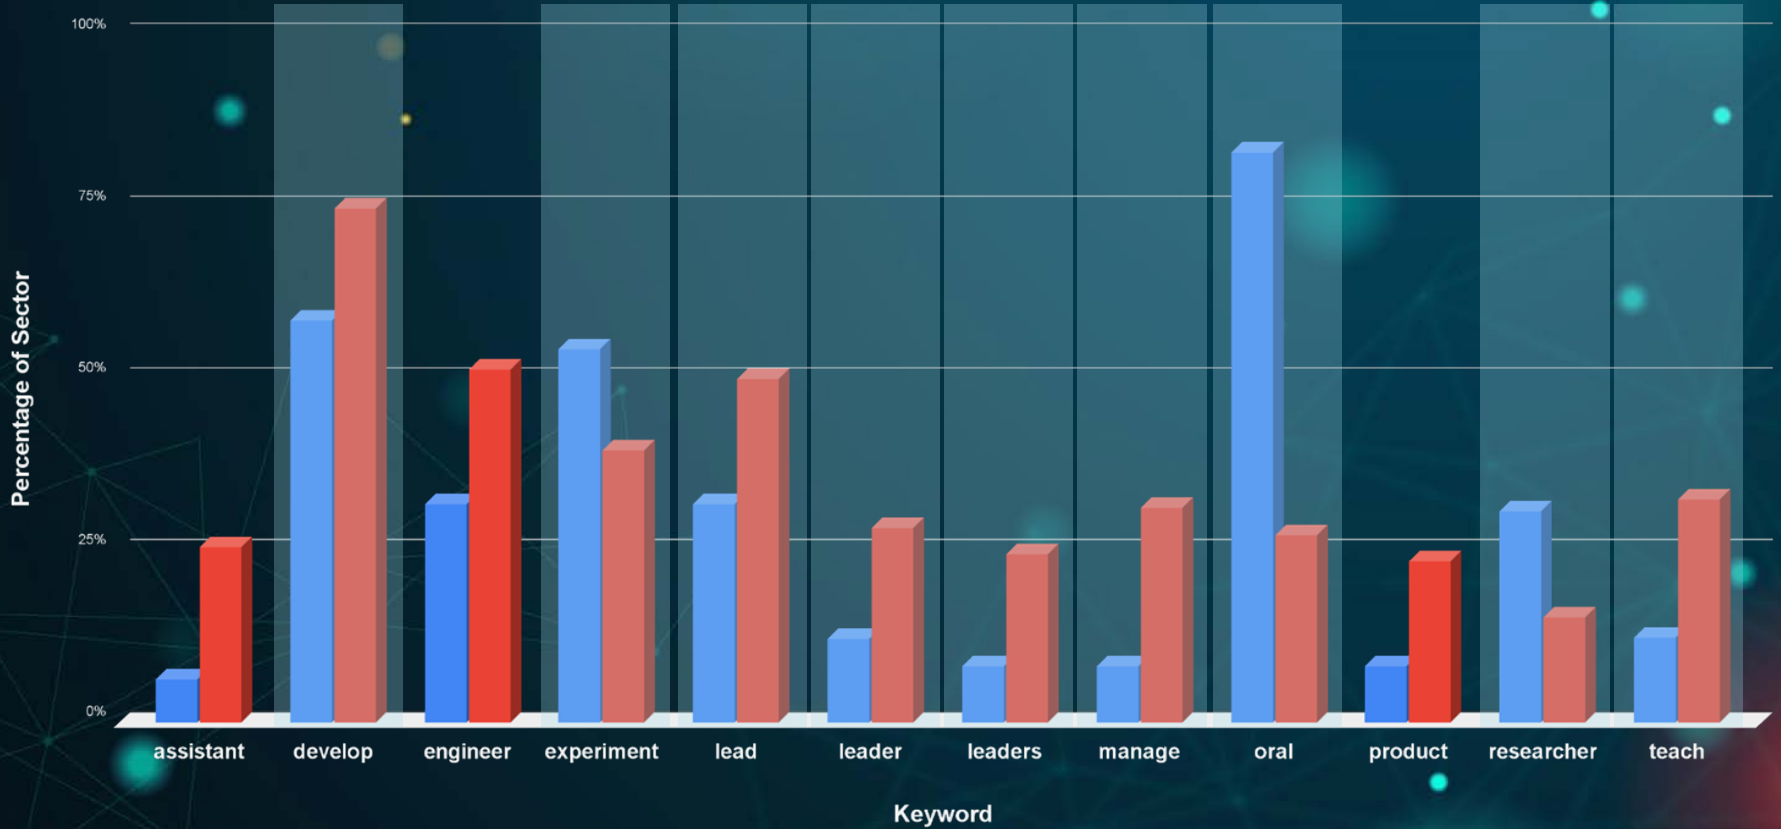

■ All Sectors
 ■ Academic
 ■ Government/National Lab
 ■ Private

**this data does not show analyses for nonprofits and other sectors*

Comparisons of Keywords by Job Permanence [Selected Terms with Standard Deviation > 10%]

■ Temporary ■ Permanent

Conclusions

01 | **Job Permanence**
Private sectors have far fewer temporary jobs

03 | **Government Terms**
Experiment appears more in government jobs, and about equally in other sectors

02 | **Sector Terms**
Academic and R&D terms appear as expected

04 | **Diversity**
Trends in diversity terms by sector vs job permanence

Next Steps

Further Analyses

Analyze job data based on degree requirements, job level, and/or location

Development

Integrate pre-processing into the job data tool and add ability to intelligently identify imported columns.
